

aurora

**THE PINNACLE OF
EXCELLENCE IN
ESPRESSO COFFEE**

AURORA is a professional multiboiler coffee machine that combines iconic Italian design with advanced technical performance. Ideal for demanding baristas, it offers precise control over coffee extraction, thanks to independent brewing groups and customizable features.

ITALIAN DESIGN AND INNOVATION :

Aurora is not just a coffee machine; it's a work of art. Its elegant and iconic design, born from Italian tradition, stands out for its refined aesthetics and attention to detail. The reduced height of the machine, designed according to the standards of the Specialty Coffee world, offers a unique visual experience and promotes interaction between barista and customer.

MULTIBOILER: TOTAL CUSTOMIZATION:

The heart of Aurora is its multiboiler system, which allows you to control the temperature of each brewing group independently. This feature allows the barista to prepare different coffees with different blends, optimizing extraction for each type of coffee and satisfying the tastes of each customer.

Temperature programming to the tenth of a degree and PID control via probes ensure absolute precision, for a consistently perfect coffee.

TECHNOLOGY AND PERFORMANCE :

▪ **Soft Infusion:**

Coffee extraction occurs via soft infusion, a process that enhances coffee aromas and ensures uniform extraction.

▪ **PID Control:**

PID temperature control, with display to the tenth of a degree, ensures maximum thermal stability.

▪ **Independent Brewing Groups:**

The three independent brewing groups, each with its own 1-liter boiler, allow you to prepare different coffees simultaneously.

▪ **Electro-mechanical Lever Switches:**

2/3 electro-mechanical lever switches with two independent doses for classic and precise extraction control.

▪ **Steam/Hot Water Boiler:**

The 12-liter (8-liter 2groups version) boiler for steam and hot water guarantees constant power and optimal steam management.

▪ **External Flanged Volumetric Motor Pump:**

The external motor pump ensures constant pressure and impeccable delivery.

STANDARD COLOURS :

 Nut Wood / Matte White

 Stainless Steel / Matte Black

TECHNICAL FEATURES :

- Multiboiler: 2/3 independent coffee brewing groups
- Joystick steam taps
- Cool-touch steam wands
- Display for functions and programming
- Programmable group washing
- Eco and stand-by function
- Dosage mixed hot water
- Standard shot timer

GROUPS HEIGHT :

AUTOMATIC

TECHNICAL DATA

2 GROUPS

3 GROUPS

Supply	Direct	Direct
Steam Boiler's Resistor Power	3000/4000 W	6000 W
Units Boiler Resistor Power	800W x 2	800W x 3
Voltage	220V - 380V	220 V - 380V
Boiler	8L - 1L x 2	12L - 1L x 3
Dimensions	81W x 51D x 30H	108W x 51D x 30H
Weight	100 Kg	112 Kg
Front Body Components	Painted Metal Finish	Painted Metal Finish
Side Body Components	Painted Aluminum	Painted Aluminum

Note:

Additional External Pump Module, housing 2/3 pumps, weighing 25kg with dimensions 50W x 30D x 40H (cm)
